Diagnostics | Redirect to lab

Description

Based on your symptoms, I think it's important to rule out a possible infection. I'm going to send you to the laboratory to get a urine sample and a blood sample. The urine sample will be tested for bacteria and the blood sample will be tested for white blood cells, which are a sign of infection.

Diagnosis

Please provide me with a urine sample in the cup provided.\nNext, I will draw blood from your vein. You may feel a slight pinch.\nThe results should be back within a few days. Your doctor will contact you to discuss the results and recommend any necessary treatment.

Hospital Management System © Ziad Gamal

Diagnostics | Redirect to ray

Description

Based on your physical exam, I think it's important to get an X-ray of your ankle to rule out a fracture. I'm concerned that you may have sprained your ankle, but I want to make sure that there is no break in the bone.

Diagnosis

This is a clear and concise way for the X-ray employee to communicate the results of the X-ray to the patient. It is also easy for the patient to understand.
